Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 14 October 2004.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Election/Restrictions

Applicant's election with traverse of group I in the reply filed on 10/14/04 is acknowledged. The traversal is on the ground(s) that the applicant did not know how the method can be used on a land vehicle. This is not found persuasive because the method as claimed can be used on land vehicles to sever extraction lines. Furthermore, the apparatus can be used differently from the claimed method. It does not have to be used to cut extraction lines.

The requirement is still deemed proper and is therefore made FINAL.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1, 6-13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Underwood et al in view of Kenzie.

Underwood et al teaches a device that is used to cut the extraction line of the parachute in case of an emergency but is silent on the radio signal to initiate a cutter that is spring biased to cut the extraction line and means to restrict the cutter from cutting the extraction line. However, Kenzie teaches that a device to restrict a cutter from cutting a line is well known in the art.

It would have been obvious to one skilled in the art at the time the invention was made to have used a cutter that is spring biased to cut the extraction line and means to restrict the cutter

Art Unit: 3644

from cutting the extraction line in Underwood et al's system as taught by Kenzie as a substitution of parts. Furthermore, the Examiner takes judicial notice that remote control means are well known in this day and age and that one skilled in the art would have used remote control means to control the cutting of the extraction line.

Please note that Underwood et al teaches the cutter having a housing 62. A housing has upper plate and lower plates and have pockets inbetween. One skilled in the art would have machined the housing to include mounting, guiding slots, and holes to accommodate the parts inside and to save weight. Please note that spacers, clamping means, and aluminum metals are well known in this day and age to have been used to create housings.

Allowable Subject Matter

Claims 2-5 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 14-15 are allowed.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Smith et al, Leger, Hoffman, Farcinade, Temple et al, Conroy et al, and Norton disclose parachute line systems.
